

**COLLAGEN  
SOLUTIONS**  
MATERIALS FOR LIFE

# Medical Device Applications for Collagen

## Neurology

Dural grafts  
Nerve repair

## Dental

Dental bone void filler  
Dental membrane  
Dental wound dressing

## Cardiovascular

Stent coatings  
Heart valve leaflets  
Vascular closure  
Vessel replacement

## Oncology

Biopsy markers

## Preclinical Research

Cell substrates & other assays

## Urology

Incontinence injections  
Dialysis membranes

## Wound Repair

Wound sponges  
Burn & wound grafts  
Dressings

## Orthopedic

Bone void fillers  
Demineralized bone matrix  
Bone graft substitutes  
Ligament & cartilage reconstruction

## Ophthalmic

Corneal shields  
Drug delivery  
Tear duct plugs

## Plastic & Reconstructive Surgery

Dermal Fillers  
Bone void fillers  
Soft tissue reinforcement grafts

## Gastroenterology & General Surgery

Hemostats  
Hernia reinforcement  
Staple line reinforcement

## Women's Health

Pelvic floor  
reconstruction

## Trauma

Sealants and adhesives  
Bone hemostat

## Other

Injectable matrices  
Tissue scaffolds

**Collagen Solutions develops, manufactures  
and supplies medical grade collagen  
biomaterials for use in research, medical  
devices, and regenerative medicine. We work  
with scientific teams to provide materials that  
optimize your application.**

**We partner with our customers to develop and deliver innovative products that improve patients' quality of life.**

## Full Range of Services

### Development & Scientific Services

---

Product Development  
Custom Formulations  
Full Regulatory Service  
Pilot Production  
Contract Manufacturing

### Biomaterials Formulated for Your Needs

---

Soluble & Polymeric Collagen  
Minimally Processed or Crosslinked Pericardium

*\*Custom collagen formulations and other tissues are also available*

## Benefits of Working with Us

### Broad Range of Materials

---

We provide a comprehensive range of collagen-based biomaterials and tissues, including pericardium. Standard collagen products can be formulated in solution, or as powders, gels, films, coatings, sponges, membranes, biological scaffolds and in many other forms.

### Working Together

---

We partner with our customers to develop or co-develop formulations, components, and finished medical devices using collagen. Our expertise and collaborative approach lead to faster time to market, improved production, and superior products.

### World-Class Standards

---

We are an approved supplier for some of the largest medical device companies in the world. We maintain strict quality and regulatory standards according to GMP, EDQM, ISO13485 and ISO 22442. Materials are sourced from BSE-free locations in Australia and New Zealand.
